## SPECIAL NOTICE

This publication is a statistical reference for agricultural exports and imports of the 2 most recent years. Selection of data is based on the most recent year. The publication also contains four additional tables that provide export and import information by commodity group and area. These tables are not available in the previous calendar year supplements. In this publication, the 1969 export and import data are unrevised.

### Exports

Commodity-by-country data (table 2) are printed at the 7-digit Schedule B commodity code level. Statistics on commodities valued at less than \$1 million were not published but are available for reference from Agricultural Specialist machine tabulations, at Trade Statistics and Analysis Branch, Foreign Development and Trade Division, Economic Research Service, U.S. Department of Agriculture. "Basket" or "catchall" classifications were also excluded since they do not provide meaningful data. Countries listed under each commodity accounted for 0.3 percent or more of the commodity's export value. The value of commodities from selected countries was subtracted from each commodity total to derive "other countries."

Country-by-commodity data (table 3) cover countries having agricultural export trade totals of \$1 million or more. The value of commodities exported to each country was summed and listed for the country at a 5-digit Schedule B level, if the commodity total was 0.5 percent or more of the agricultural exports to that country, with the following exceptions: Commodities to Canada, United Kingdom, Netherlands, France, West Germany, and Japan were listed if they accounted for 0.1 percent or more. Commodities exported to Mexico, Belgium and Luxembourg, Italy, and the Philippines were listed if they accounted for 0.2 percent or more. An asterisk (\*) designates that the 5-digit Schedule B level excludes the 7-digit nonagricultural commodities. Value of selected commodities was subtracted from each country total to derive the "other agricultural products."

In commodity group-by-country data (table 5), 7-digit Schedule B commodity codes were summed to group totals. The countries listed under each group accounted for 0.3 percent or more of the commodity group's export value with the following exceptions: Wheat, rice, feed grains, grains and preparations, corn, wheat and wheat products, grain sorghums, wheat and wheat flour, feed grains and products, and nonfat dry milk were listed if they accounted for 0.1 percent or more.

### Imports

Commodity-by-country data (table 11) are printed at the 7-digit Schedule A commodity code level. An asterisk (\*) designates that the 7-digit Schedule A excludes the nonagricultural TSUSA commodities. Basket categories were excluded. Statistics on commodities valued at less than \$1 million are available but not published. The countries listed under each commodity accounted for 0.3 percent or more of the commodity's import value. The value of commodities from selected countries was subtracted from each commodity total to derive "other countries."

Country-by-commodity data (table 12) cover countries having agricultural import trade totals of \$1 million or more. The value of commodities imported from each country was summed and listed for the country of origin at a 5-digit Schedule A level if the commodity total was 0.3 percent or more of the agricultural imports from that country. An astrisk (\*) designates that the 5-digit Schedule A level excludes nonagricultural 7-digit Schedule A commodities. Value of selected countries was subtracted from each country total to derive the "other agricultural products."

In commodity group-by-country data (table 14), 7-digit TSUSA commodity codes were summed to group totals. The countries listed under each group accounted for 0.3 percent or more of group's total.

Explanatory Note

U.S. foreign agricultural trade statistics in this report include official U.S. data based on compilations of the Bureau of the Census. Agricultural commodities consist of (1) nonmarine food products and (2) other products of agriculture which have not passed through complex processes of manufacture such as raw hides and skins, fats and oils, and wines. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and intransit through the United States from one foreign country to another when documented as such through U.S. Customs.

**EXPORTS** The export statistics also exclude shipments to the U.S. armed forces and diplomatic missions abroad for their own use and supplies for vessels and planes engaged in foreign trade. Data on shipments valued at less than \$251 are not compiled by commodity and are excluded from agricultural statistics but are reflected in nonagricultural and overall export totals in this report. The agricultural export statistics include shipments under P.L. 83-480 (Agricultural Trade Development and Assistance Act), and related laws; under P.L. 87-195 (Act for International Development); and involving Government payments to exporters. (USDA payments are excluded from the export value.) Separate statistics on Government program exports are compiled by USDA from data obtained from operating agencies.

The export value, the value at the port of exportation, is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port. The country of destination is the country of ultimate destination or where the commodities are to be consumed, further processed, or manufactured. When the shipper does not know the ultimate destination, the shipments are credited to the last country, as known to him at time of shipment from the United States, to which the commodities are to be shipped in their present form. Except for Canada, export shipments valued \$251-\$499 are included on the basis of sampling estimates; shipments to Canada valued \$251-\$1,999 are sampled.

**IMPORTS** Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption. The agricultural statistics exclude low-value shipments from countries not identified because of illegible reporting, but they are reflected in nonagricultural and overall import totals in this report.

The import value, defined generally as the market value in the foreign country, excludes import duties, ocean freight, and marine insurance. The country of origin is defined as the country where the commodities were grown or processed. Where the country of origin is not known, the imports are credited to the country of shipment.

Imports similar to agricultural commodities produced commercially in the United States and others that are interchangeable in use to any significant extent with such U.S. commodities are supplementary, or partly competitive. All other commodities are complementary, or noncompetitive.

Further explanatory material on foreign trade statistics and compilation procedures of the Bureau of the Census is contained in the publications of that agency.

Special category total 3/ .....	46,817	12,115								
Total domestic exports .....	33,981,655	37,444,259								

1/ Exclusive of Special category commodities. (For security reasons detailed subgroup and country of destination are not shown in published export statistics for a selected list referred to as "Special Category" commodities). 2/ Because of transshipments, the value of U.S. exports are overstated to such countries as Canada, Netherlands, and Belgium and understated to such countries as West Germany, United Kingdom, Switzerland, Ireland, Italy, Denmark, Sweden, Norway, and others. For details of transshipments through Canada, and Netherlands, see Tables C and 9. 3/ Includes programs authorized by Public Law 85-480, the Agricultural Trade Development and Assistance Act of 1954, as amended, and by Public Law 87-195, the Foreign Assistance Act of 1961, as amended. 4/ Total agricultural exports outside specified Government Programs (sales for dollars) include, in addition to unassisted commercial transactions, shipments of some commodities with governmental assistance in the form of (1) extensions of credits and guarantees for relatively short periods, (2) sales of Government-owned commodities at less than domestic market prices, and (3) export payments in cash. 5/ Less than \$500. 6/ The apparent excess of Government-financed exports over total exports may be due to lags in reporting differences in valuation procedures, or the recording of the export as destined for the country through which transshipment was made. 7/ Donations through the United Nations Relief and Works Agency (UNRWA) for the relief of Palestine refugees. 8/ Not available by countries. (See explanations in 1/).
